**NAUTILUS**

**Sistema di alleggerimento solette in c.a. bidirezionali**

**HELPS TO OBTAIN 12 LEED® POINTS**

NAUTILUS the plastic system for voided two-way slabs helps you get up to 12 points for LEED certification. Potential points available

<b>MATERIALS AND RESOURCES</b>		<b>Contribute by 9 points</b>
Credit 1.1	<b>Reuse Of Buildings: Maintain 75% of Existing Walls, Floors and Roof</b> (helps to reduce waste and environmental impact of new buildings also in relation to the processing and transport of materials).	1
Credit 1.2	<b>Reuse Of Buildings: Maintain 95% of Existing Walls, Floors and Roof</b> (helps to reduce waste and environmental impact of new buildings also in relation to the processing and transport of materials).	1
Credit 1.3	<b>Reuse Of Buildings: Maintain 50% of Non-Shell/Non-Structure</b> (helps to reduce waste and environmental impact of new buildings also in relation to the processing and transport of materials).	1
Credit 2.1	<b>Construction Waste Management: Divert 50% From Landfill</b> (helps to prevent construction waste are dumped in landfills and / or incinerators and re-enter the recyclable resources back into the production process).	1
Credit 2.2	<b>Construction Waste Management: Divert 75% From Landfill</b> (helps to prevent construction waste are dumped in landfills and / or incinerators and re-enter the recyclable resources back into the production process).	1
Credit 3.1	<b>Resource Reuse: 5%</b> (helps to reduce the demand for virgin materials and waste generation, thereby limiting the environmental impacts associated with the processing of primary resources).	1
Credit 3.2	<b>Resource Reuse: 10%</b> (helps to reduce the demand for virgin materials and waste generation, thereby limiting the environmental impacts associated with the processing of primary resources).	1
Credit 4.1	<b>Recycled Content: 10% (post-consumer + 1/2 pre-consumer)</b> (helps to increase the demand for materials and construction products that contain recycled materials, thereby reducing impacts resulting from extraction and processing of virgin materials).	1
Credit 4.2	<b>Recycled Content: 20% (post-consumer + 1/2 pre-consumer)</b> (helps to increase the demand for materials and construction products that contain recycled materials, thereby reducing impacts resulting from extraction and processing of virgin materials).	1
<b>INNOVATION &amp; DESIGN PROCESS</b>		<b>Contribute by 3 points</b>
ID Credit	<b>Supplement to Materials and Resources Credit – Credit 2.2</b> (contributes to re-enter the recyclable resources back into the production process to 100%).	1
ID Credit	<b>Supplement to Materials and Resources Credit – Credit 3.2</b> (contributes to decrease the demand for virgin materials and waste generation to 100%).	1
ID Credit	<b>Supplement to Materials and Resources Credit – Credit 4.2</b> (contributes to increase the demand for products that contain recycled material to 100%).	1
